The Advance

U. F. A. Names Reid As Successor To Brownlee Assurance of Support

Hon. R. G. Reid Receives Endorsement of U.F.A. Recommendation Is Presented to Lieutenant-Governor With Brownlee's Resignation

EDMONTON, July 5.—After a caucus continuing through the past two days, U.F.A. government members today unanimously agree in their selection of Hon. R. G. Reid as successor to John E. Brownlee who tendered his resignation as Premier this week. Mr. Brownlee's resignation, together with the recommendation of Hon. Mr. Reid, has been placed in the hands of the Lieutenant Governor with the statement that the government members are in full agreement as to the selection.

Premier J. E. Brownlee, for almost a decade leader of the Alta Farmers' Government, has handed in his resignation to a caucus of the U.F.A. in session at Edmonton this week following conclusion of the seduction case against the premier in which the jury returned a verdict in favor of the plaintiff on Saturday evening.

Final evidence submitted in the MacMillan-Brownlee seduction case was presented on Saturday and the case went to the jury of six men. After practically five hours deliberation, this jury at 9 p.m. brought in the unanimous verdict in favor of the plaintiff, awarding \$10,000 to Vivian MacMillan and \$5,000 to her father.

Mr Justice Ives expressed strong disapproval of the finding and on the appeal of M. M. Porter K. C., associate defence council with Mr. Smith, stated that he would give a written opinion upon the verdict.

On Wednesday Judge Ives delivered judgement and dismissed the action with costs. This in effect means that instead of the plaintiffs receiving \$15,000 damages awarded them by the jury against Premier Brownlee on the seduction charge, Vivian MacMillan and her father will receive no damages and will also be required to pay the costs of the action.

The following is the judicial finding in full.

With Parents' Consent

"It is quite clear that the daughter left her home in Edson with the consent and approval of her parents and was accompanied to Edmonton by her mother. It is equally undoubtful that no illness resulted from the seduction and evidence that the ability of the daughter to render services was in any way interfered with.

"In my opinion the law is well settled that damages is the gist of the action and I am also of the opinion that the damage necessary to found a right of action in the woman must be of the same character as gave the master his right of action, that is, loss of service, or at least an interference with the woman's ability to serve. I see nothing in our statute to convey a contrary intentment of the legislature.

"In my view of the law the action must be dismissed with costs including cost of discovery, and only one bill should be taxed.

"No evidence being offered by the defendant on his counter-claim it will be dismissed with costs including discover.

W. C. IVES,

J.S.C.

Calgary
July 2, 1934

Mrs. F. Otto left for Calgary on Tuesday where she will take part in the Stampede, also visit with her daughter, Mrs. P. R. Dobson

Resigns

Premier J. E. Brownlee, who has tendered his resignation. A jury of six men returned a verdict against him in the MacMillan-Brownlee seduction case and awarded the plaintiff damages totalling \$15,000. Mr. Justice Ives, however, dismissed the action and assessed costs against the MacMillans in his decision handed down on July 3, 1934.

R. G. Reid and Cabinet Sworn In---Three New Ministers Get Portfolio

Premier R. G. Reid & Cabinet Sworn in — Reid succeeds Brownlee to Head Third U. F. A. Administration.

EDMONTON, July 11—With the inclusion of three new cabinet ministers, namely, J. J. MacLellan, Taber; J. Russell Love, Wainwright, and Hugh W. Allen, Grande Prairie, Alta. The new Cabinet is as follows:

Premier and provincial secretary, Hon. R. G. Reid.

Minister of public works Hon. J. J. MacLellan.

Provincial treasurer, Hon. J. Russell Love.

Minister of lands, mines and municipal affairs, Hon. Hugh W. Allen.

Minister of health and telephones, Hon. George Hoadley.

Minister of agriculture, Hon. F. S. Grisdale.

Minister of education, Hon. Perrin E. Baker.

Attorney-general, Hon. J. F. Lynnburn, K. C.

Minister without portfolio, Hon. Irene Parby.

Mrs. Kerby and little daughter of Hanna, visited last week with Mrs. Kerby's parents, Mr. and Mrs. Jas. Young.

The Misses Ethel and Mabel Young are attending the Calgary Stampede this week.

The crop in this district never looked better than it does at the present time, it is all headed out with good color.

"Fresh from the Gardens"

United States Joins The ILO.

More than ordinary significance attaches to recent decision of the American Congress to apply for full membership of the International Labor Organization at Geneva, usually referred to as the ILO. Not only will accession of the United States add considerably to the prestige that organization now enjoys, but, bringing as it will the U.S. into direct confrontation with this important branch of League of Nations' activity, the move will do much to restore prestige lost by the parent body through recent defections, notably that of Japan.

Press despatches have revealed little of the background, few of the motives, behind this change of front on the part of the Washington government. It is true, of course, membership of the International Labor Organization does not involve endorsement of the League covenant, nor does it entail any political commitments to the League as such. In fact, the U.S. desire to provide adequate safeguards against the "foreign entanglements" that country has so rigorously eschewed since the war, is exemplified in the act of Congress which specifically declared that the United States, by membership in the ILO, shall assume "no obligations under the covenant".

This, of course, is possible. The International Labor Organization, like the World Court upon whose bench the United States long has been represented, is an autonomous section of the League of Nations. Membership in either or both is possible without acceptance of the covenant. Germany, as a matter of fact, was an active, full-fledged member of the ILO for six years before becoming a member of the League of Nations. The connection between the organization and the League is derived not from the covenant but from the charter of the ILO, which is Part XIII. of the Treaty of Versailles.

The International Labor Organization is, however, much closer to the League than is the World Court for the reason that it is, essentially, a means of getting international legislation enacted, or treaties negotiated, as is the League itself. The heart of the League system is its permanent mechanism for continuous international negotiation, and the ILO parallels this machinery throughout, in its limited field of social questions.

The importance of the United States' decision to join the International Labor Organization, therefore, can best be deduced by considering it in relation to the economic problems created by varying standards of living, hours of labor and rates of wages, in nations now competing for foreign markets, and also by contrasting the present action with Washington's past attitude towards the Geneva labor office.

Hitherto, the United States has been far colder to the ILO than any other branch of League activity. Until one year ago, the United States government would have nothing whatever to do with the labor organization, but now, without any parade or ballyhoo, Congress has accepted, virtually without demur, the proposal to apply for membership. This will involve representation on the permanent secretariat at Geneva and ultimate appointment of American representatives to the personnel of the central office.

Psychologically, the action of Washington will have more far-reaching effects. It will give Japan, Germany and Italy "furiously to think" for, if President Roosevelt can persuade Congress to make so complete a volte face in so short a time in connection with one great section of League activity, it follows that but little additional pressure would be required to convert his legislators to the idea of accepting the League covenant. Despite present reticences, and the insistence upon non-political safeguards, American opinion relative to the League is undergoing a change—and that change is not so far short of accepting League membership as to make that end remote. If it comes to pass that the United States enters the League, that body will immediately assume grander and nobler proportions in the eyes of the world, and the dreams of those who called it into existence will be within sight of fulfillment.

China Holds Cricket Fights

Sportmen Will Pay Ten Dollars For Good Fighter

A great effort is being made in China to stamp out cricket-fighting. It is being made as great a legal offence as opium smoking, and punishable with equally severe sentences. Despite the efforts made to stop the "sport," an enormous amount of it goes on. Chinese will pay as much as \$10 for a good fighting cricket, and many make it a business to breed them and train them for fighting, in the same way as cocks used to be trained for the old English sport of cock-fighting. The crickets face each other in elaborate bamboo "rings," down the middle of which a glass slide runs, through which the fighters glare at each other until such time as their ire is sufficiently aroused for the attack. Large stakes change hands during the fights.

Gave Lindbergh First Ride

H. R. (Russ) Overly, the man who gave Col. Charles A. Lindbergh his first airplane ride, is dead. His book "We" Lindbergh wrote how he was first inspired to fly while watching Overly's plane soaring over Madison.

Milk has the highest food value of all foods and is considered the most nearly perfect food.

Plans Big Undertaking

Hundred-Mile Wide Shelter Belt Being Considered By Roosevelt

President Roosevelt is considering a proposal to plant a "shelter belt" of trees 100 miles wide and stretching across the United States from Canada to the Texas panhandle.

This gigantic scheme, requiring 10 to 12 years to complete, would aim to minimize drought and help prevent winds from stripping farm lands of their choice soil, it was announced recently by the American Tree Association. Planting in the 100-mile wide area would be in strips, running north and south.

There would be 100 strips of trees, or one to a mile. The shelter belt would stretch 1,300 miles through North Dakota, South Dakota, Nebraska, Kansas and Oklahoma to the Texas border.

Producing four different letter-heads at one impression, using two kinds of paper stock and printing four different colors at the same time, can be done by presses equipped with a new device.

Automatic telephones are rapidly being installed in Northern Ireland. Recently the twenty-third rural automatic exchange was opened and a number of others are in course of erection.

Change of Climate, Diet, Water Often the Cause of Diarrhoea

If you are suddenly attacked with Diarrhoea, Dysentery, Colic, Cramps, Pain in the Stomach, Summer Complaints, and Complaints of the Bowels, do not waste valuable time, but get a bottle of Dr. Fowler's Extract of Wild Strawberry and see how quickly it will relieve you.

This bowel complaint remedy has been on the market for the past 88 years. Proof enough that you are not experimenting with some new and untried medicine.

Do not accept a substitute. Get "Dr. Fowler's" when you ask for it, and be on the safe side.

Put up only by The T. Milburn Co., Ltd., Toronto, Ont.

Project May Succeed

New Process Being Tried To Dredge Gold From Fraser River

The golden wealth in the sands of the Fraser river, which has till now proved largely elusive to the efforts of man, and of which there is said to be enough to pay the national debt of Canada many times over, is to be attacked this summer with a new type of dredge, and with what appears to be every prospect of success.

The structure, now nearing completion, is the largest work of its kind ever attempted on the Pacific coast, incorporating for the first time anywhere in the world an entirely new process as applied to gold dredging.

Built under the engineering advice and supervision of Hume Robertson, placer mining engineer, who has had 20 years' experience in that kind of work with British companies in the Malaya Peninsula, the great bulk may now be seen assuming final shape at the shipyards of B.C. Marine Engineers and Shipbuilders Limited.

Hydraulic pumps, with suction strength of 200 pounds to the square inch, created by two 500-h.p. motors will raise the sands from the bottom of the river and the complete process of washing and refining will be completed upon the dredge.

Capacity, with the present equipment, is placed at 12,500 cubic yards a day, but provision has been made for double the present sluicing areas by the addition of an upper deck, on an incline of 13 feet from bow to stern.

The whole operation will be electrically driven with individual motors and control switches on the bridge towards the bow of the structure. Present estimates indicate an operating cost of not more than two cents a cubic yard.

Hydro-electric plant is to be constructed on Jones Creek, near where the dredge will be put into operation, and will generate 2,000 horse-power. It is understood that work upon this phase of the undertaking is to start at once.

If the operation of the first dredge proves successful—and every possible safeguard against failure seems to have been taken—the company will proceed to the construction of other dredges of similar model.

Smaller units will be needed in some parts of the river under lease, but all will incorporate the present equipment, with such improvements as practice may suggest.

Problem in South Africa

Many Pupils With Scottish Names Speak No English

As in Quebec so in South Africa there are people with pure Scottish names like Campbell, Fraser and MacDonald, who speak little or no English. Dr. S. H. Eloffsen, Director of Education of the Orange Free State in the Union of South Africa, remarked after an investigation of Quebec school conditions.

Dr. Phelissier went to Quebec to study the question of bilingualism and how it is handled in Quebec. In South Africa they have the same problem, the majority of the pupils speaking Dutch and the minority English. They also are faced with the difficulty of educating children in the outlying sections, as in Quebec.

Dr. Phelissier said the children with the Scottish names are the descendants of settlers who married Boer women. They gave their names to their wives but the mothers passed their own language to their offspring.

There would be 100 strips of trees, or one to a mile. The shelter belt would stretch 1,300 miles through North Dakota, South Dakota, Nebraska, Kansas and Oklahoma to the Texas border.

Producing four different letter-heads at one impression, using two kinds of paper stock and printing four different colors at the same time, can be done by presses equipped with a new device.

Automatic telephones are rapidly being installed in Northern Ireland. Recently the twenty-third rural automatic exchange was opened and a number of others are in course of erection.

Year Of Anniversaries

At Least Three Will Be Commemorated During 1934

That 1934 is a year of anniversaries was recalled by Victor Morin, chairman of the Montreal committee on the Jacques Cartier observances, to the Quebec Women's Institutes convention.

In 1534 occurred the discovery of Canada by Jacques Cartier; in 1634, the extension of the colony by the founding of Three Rivers; in 1734, the opening of the first road between Quebec and Montreal; and in 1834, the granting of its charter to Toronto.

CAN'T SLIP OR SLIDE FALSE TEETH

Don't use any old kind of remedy to keep false teeth in place—use a reliable, recognized one which dentists prescribe such as Dr. Werner's "Gum-It" or the newest salve in the world—grip teeth so secure yet comfortable they feel natural. Positively no slipping or clicking—blissful comfort assured all day long, especially when you have to eat and speak and laugh. No clover paste—keeps mouth sanitary—breath pleasant. Inexpensive—all druggists.

Some Long Sleeps

But Record Of Rip Van Winkle Still Stands

A Huddersfield man has had no sleep for eight weary years. Not even morphine can give him an hour of real sleep. How he must envy such a man as W. Foxley, pot-maker to the Mint, who fell asleep on April 27th, 1934, and slept serenely for fourteen days and fifteen nights. Fourteen days is only a nap compared with the exploits of some sleepers. A German civil servant named Arhelin, forty-five years old, slipped into one evening as he got out of a train and knocked his head on the pavement. He was taken home and put to bed. The doctors said there was no concussion or serious injury. Next morning he was still asleep, and he slept for two years and four months. He was a week when at last he woke, yet in the end he recovered. There was the famous Marguerite Bovalen, "the Sleeping Woman of Thenolens," who was thrown into a trance-like sleep by a fright and slept for nineteen years and six months. Then she slowly roused, was able to talk, but she was wasted to a skeleton, and died five months later. The record Rip Van Winkle is an American, a farmer called Harms. He came in one evening, tired after a long day's work, went to bed and slept for twenty-six years. It was possible to rouse him to take food, but he could not stay awake more than five minutes. Like the French woman sleeper, he wasted away and died.

The whole operation will be electrically driven with individual motors and control switches on the bridge towards the bow of the structure. Present estimates indicate an operating cost of not more than two cents a cubic yard.

Hydro-electric plant is to be constructed on Jones Creek, near where the dredge will be put into operation, and will generate 2,000 horse-power. It is understood that work upon this phase of the undertaking is to start at once.

If the operation of the first dredge proves successful—and every possible safeguard against failure seems to have been taken—the company will proceed to the construction of other dredges of similar model.

Smaller units will be needed in some parts of the river under lease, but all will incorporate the present equipment, with such improvements as practice may suggest.

French Company Will Survey Bear Lake

If Report Is Satisfactory Capital Will Be Invested

A vast amount of French capital will be invested in development in the Great Bear Lake mining district, providing that a survey to be made this summer by Dr. Edmund Bruet, who arrived at Edmonton from Paris, proves satisfactory.

Dr. Bruet, answering questions which were interpreted by Paul Jenvrin, former French consul at Edmonton, stated that there was no question of large scale development being undertaken if his report recommends such action.

Dr. Bruet is vice-president and director of Olymnia, a large French company which is interested in mineral resources all over the world. It has organized a Canadian branch which would carry on the work in the north country.

The company is interested in gold, silver, pitchblende, and any of the other mineral discoveries in the far north. Also representing the department of natural resources at Paris, Dr. Bruet will study the habits and conditions of the Indian tribes in the north. He also expects to take back to Paris specimens of plant life and also insects found in the north country.

Queen's Voice Over Radio

For the second time in the history of broadcasting the queen's voice will probably be heard on the wireless in September, the occasion being the launching of the Cunarder, No. 54, at Clydebank. Her Majesty having been heard on the wireless in the early days of the British Broadcasting Corporation.

Find Gold In Meteorites

Science's first recorded discovery of gold that has fallen from the sky to the earth was reported at Berkeley, Calif., by Dean Gillespie, of Denver, before the meeting of the American Association for the Advancement of Science. Minute amounts of gold were detected in a meteorite found near Melrose, N.M.

Is Crack Shot

Sergeant Forslund Of R.C.M.P. Excels With Rifle And Revolver

The crack shot of the Royal Canadian Mounted Police, according to the annual report of that force tabulated in the House of Commons, is Acting Sergeant D. E. Forslund, who serves in "K" (Alberta) division.

Not only does Sergeant Forslund excel with the rifle, but he also is a sure marksman with the revolver. He is the present holder of the Connaught cup. While attending an instructional class at Regina, he fired a course and secured a possible 240 points.

The Importance of Tobacco Seed

Importation of tobacco seed from Canada from Australia and the United States is prohibited in order to keep out blight which disease (unknown to exist in Canada) which has been responsible for serious losses to flue-cured tobacco in those countries.

Total storage stocks of eggs in Canada at June 1 were 9,049,335 dozen, as compared with 11,507,606 dozen on June 1 last year, and with a five-year average on June 1 of 11,270,061.

May Join League

By Doing So Russia Would Gain Confidence Abroad

Russia, it is said, plans to enter the League of Nations, and is only delaying to decide what manner of entry would leave it the least explicable to do as to why it stayed out so long.

A chivalrous desire to help keep peace in Europe is credited to Moscow, no doubt correctly. But there is shrewdness, as well as chivalry in the move. Stalin has troubles enough, without having to keep a watchful eye always on the western front.

In particular he has occasion to focus attention on the far end of his dominion, in which quarter Japan is carving out a place for itself in the Oriental sunshine without much regard for what Russia may want.

Joining the League would be for Russia the next thing to making a general treaty of offensiveness with Europe, and leave the Soviet directorate free to pay attention to urgent matters in the Far East.

Japan undoubtedly sacrificed a measure of world confidence when it quit the League. Russia would correspondingly gain confidence abroad if it joined the League and thus associated itself with the proclaimed purposes of that organization.—Edmonton Bulletin.

Turns Page In History

British Girl Retains Nationality Although Married To Frenchman

An English girl of 21 has turned a new page in the story of English women's fight for equal rights with men.

For pretty Ina Ginn, of Stanmore, Middlesex, has become Mme—or rather Mrs. Lucien Albert of Paris, and retained her British nationality. She is the only Englishwoman to have married a Frenchman—or any foreigner—and remained British.

Shyly she told of how she wrote to the Home Secretary on her engagement, explaining her patriotic desire; of the long negotiations with French and British authorities.

She went to Paris to be married—on Boxing Day. Since then, privately, she has had no nationality—until now.

She displayed the new British passport, in her married name, which she has just received. Written in by hand was read: "British subject under the provision of the British Nationality and Status of Aliens Act, 1933, wife of a French citizen."

Machine Reads Minds

Graph Paper Takes Record Of Reactions On Brain

The old story about the walls of Jerry-built houses being so thin that you could hear your neighbor changing his mind seems likely to come very near the truth. A machine invented by Dr. Alexander Cannon records any mental reaction, and consists of flexible tubes which are attached to a human subject. The reactions of the brain are recorded on graph paper. Simple emotions like surprise, love, hate, are recorded, and the machine also registers mental fatigue, the capacity of the mind, reaction to tension or concentration, suicidal tendencies, and whether the subject is telling the truth or lying. Among other things, it shows that waltz music is soothing, and that it relieves asthma by inducing regular breathing. It is also claimed that it proves telepathy to be a physical fact.

Just Moving Again

When Mark Twain was a young and struggling newspaper writer in San Francisco, a lady of his acquaintance saw him one day with a cigar box under his arm looking in a shop window.

"Mr. Clemens," she said, "I always see you with a cigar box under your arm. I am afraid you are smoking too much."

"It isn't that," said Mark, "I am moving again."

BABY'S HEAT RELIEVED! IRITATION Relieved!

In babies, stomach disorders and indigestion occur frequently. Also children may play too hard. Mrs. Mary Wilson, 53, of Atlanta, Ga., has a baby, Nelly, 10 months. When the children are overtired and restless in warm weather I give them Baby's Heat Reliever. Before retiring and in the morning they are happy, contented children. Soothing, cooling, and refreshing, Baby's Heat Reliever effectively relieves colic, summer complaints and all minor disorders. Price 25¢ package. Dr. Williams'

BABY'S OWN TABLETS

Indian Rope Trick A Myth

Occult Committee Says No One Has Ever Seen It

As the result of a solemn inquest held by the Occult committee of the Magic Circle—a group of bona fide scientists—the Indian rope trick to-day reposes under a headstone officially chiseled "myth".

Nobody, evidently before the committee showed, has ever performed the rope trick—wherever an Indian fair is supposed to toss a limp rope vertically into the air, whereafter a boy nimbly climbs the air of view into the heavens. Nobody could be found who had seen the trick done. So, in effect, the occultists found that neither the rope nor the story will "stand up". The group has offered \$2,500 to anyone who will perform the feat.

Lord Amphil, once viceroy of India, presided over the committee's meeting.

How India was scored and large rewards were offered futilely for a rope trickster when King George and Queen Mary toured India early in their reign was told by Sidney Clarke, chairman of the Magic Circle.

Even the great Nizam of Hyderabad, with limitless resources, was unable to locate a juggler who could do the rope trick when asked to provide one for a giant garden party, related his friend, Sir Michael O'Dwyer. In 25 years in India, Sir Michael never found anyone who had seen the trick.

Harry Price, director of the National physical laboratory, said he had collected a library of 12,000 books about magic, and not one contained any genuine evidence about the trick.

Sir Francis Griffin, formerly an inspector-general of police in India, imputed belief in the rope trick to the power of suggestion, like the impulsive American lady of travel who said the most remarkable thing she had seen in all India was the sun setting behind the Aga Khan.

British Aviatrix On Visit

Amy Mallison Made Short Stay In New York

Feeling "very fit" Amy Mallison, British aviatrix, arrived on the liner Majestic for a short visit in New York.

Since the crash in Connecticut of the plane in which she and her husband, James Mallison, made a westward crossing of the Atlantic in 1933, she had done little flying, she said; "just a little for my own pleasure."

She said that she and Mallison were looking forward with enthusiasm to the England-Australia air races next October in which they will participate.

Just Moving Again

When Mark Twain was a young and struggling newspaper writer in San Francisco, a lady of his acquaintance saw him one day with a cigar box under his arm looking in a shop window.

"Mr. Clemens," she said, "I always see you with a cigar box under your arm. I am afraid you are smoking too much."

"It isn't that," said Mark, "I am moving again."

Backaches

Infant kids trouble. Gin Pills give prompt and permanent relief as they act directly and boldly on the kidneys—soothing, healing and strengthening them. 5¢ a box at all druggists.

SYNOPSIS

Camilla Hoyt and Peter Anson, young and in love, marry secretly, deciding to live their own lives apart until Peter is able to provide for her. Peter is a young, struggling sculptor trying to make his mark in art scholarship abroad and Camilla is the adopted daughter of a wealthy family. She is not to inherit money when she comes of age and so is studying to be a teacher with the hope of landing an agency job. Others in the story are Avis Worth, another wealthy girl who is trying to win Peter away from Camilla; Peter's mother and Mrs. McLean, his old room-mate with whom he has quarreled. After a party at an exclusive club where the rest of the members of the party go to have fun, Peter and Camilla slip off to the beach by themselves and fall asleep on the sand. When they awake it is early morning and Avis and Mrs. McLean are standing there. This makes Peter nervous for Camilla to announce before the party that she and Peter are married. Camilla urges Peter to accept some of her savings to help him get "Paris" references and they scatter. After Camilla had gone from the studio, Avis calls and persuades Peter to accept a loan of \$1,000. Peter finds that Camilla has given him some Camilla for suggestions as to a name for it. Camilla suggests "Eager Youth" and Avis "Inspiration". Peter takes the latter title and Camilla heartily goes to the studio for quiet and to think. Peter and Avis follow later, and as the lights are turned on, see the statue has been shattered to pieces. Avis starts to cry and Camilla, stunned by the disaster, and hurt and horrified by the accusation, faints.

At Camilla's suggestion, Peter enters as his exhibit a statue he had sculptured especially for her as a wedding gift. They named it "Land of Hope".

(Now Go On With The Story)

CHAPTER LI.

Avis managed to visit the exhibit alone with John Donforth on the day before the final vote would be cast for the winner of the Paris scholarship. She had made the coincidence seem casual enough. And her interest in art had elicited her uncle's unqualified approval from the beginning. His own sons and only daughter had evinced none of his aesthetic appreciation, which was one of the few disappointments of his life. So, when his niece not only patronized the profession but actually won her degree at National, he was immensely proud, and sympathetic with her plans and interests.

So generous was his measure of approval that he had purchased one of her best paintings and hung it in his library, though he had to admit to himself that she couldn't have sold it elsewhere for a song. But he advocated that praise stimulate effort and encourages ambition.

He was particularly noted for his philanthropy to talent, and not a small part of the Paris scholarship fund was responsible to his generosity; but he never permitted his left hand to suspect what kept his right hand so busy.

"The judges have no easy task, I can tell you that," he confided to Avis at the exhibit. "It was difficult even to eliminate the entries."

"Do only beauty and perfection of detail enter into the consideration?" she asked, seriously.

"Oh, no, there are many points to be considered."

"Such as—"

"Subject matter, position, execution of material—"

"Does the thought behind the object—the reason for the creation, its originality—mean anything?"

"Indeed, it means a very great deal. Is there a piece here in which you vision a purpose, a story?"

"Oh, yes, a splendid one, Uncle John. Stand just here and look at that group over there, third from the end. Doesn't it tell you a dramatic story?"

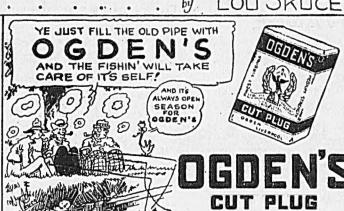

RIT COLOR STAYS IN

Now you can color lingerie, shirts, slips, coverlets, etc., and the color will STAY. The new Instant Rit soaks in the color. That's why you never have streaks and spots—*and why Rit stays in*—last and last—33 Colors.

YOU'LL HAVE BETTER LUCK WITH RIT

NEW!
No longer a soap!
Dissolves instantly.

OGDEN'S
CUT PLUG

"Yes, I remember it well in the original selection. There was no question about entering it, I recall. Undoubtedly, it is one of the best. But there are so many among the best."

"But what other one tells so plainly a story of life?" she insisted. "There is the seal—beautiful! And a sea gull; a splendid likeness of Andrew Havelock—after all, just a sea gull!" she said, smiling. "I mean that he deserves it," Avis defended.

"I don't doubt that," he agreed. "Well, my dear, if I will relieve your anxiety and you will keep the secret to yourself, he already had my vote from the beginning. I mean that my opinion could have wavered between that and the Havelock portrait, but since there had to be some dividing factor, your interest in Peter Anson might as well be it. I see nothing unethical about that. It is merely a matter of matching points, and, as you say, the vision and the story behind that group of immigrants should be favored. But don't hope too much. My vote is only one of seven, you know."

She hugged his arm affectionately.

"One of seven is better than none. I am glad to know that Peter will draw attention to his work, at least.

And you might be able to influence a good sale for him," she suggested, covertly.

"Perhaps I can," he agreed, with an amused smile.

Meanwhile, the results on Camilla's work were progressing rapidly. Wheatear Cereal sales had doubled within a fortnight, production was speeded up, the company was one of few in the city calling back its former employees. Negotiations were being made with a national radio network to broadcast a Tiny Tot series for a children's half-hour program. Consultations, plans, discussions, were in order.

Camilla was the central figure. Her brain whirled with the exhilaration of so much attention and approbation, even while it functioned calmly and clearly with the execution of her plans.

Finally, it was decided that she should prepare the stories, being the only person familiar with the characteristics and activities of her diminutive people. Her salary would be doubled and an additional sum paid for each story. These would be comparatively easy for her to produce, because they would follow the same action as appeared in the advertisements. The work would involve only a little more time, which she could now spare from her drawing board, and her remuneration would be double thereby.

The, then the most astonishing development of all was presented to her. The radio manager insisted that the obvious person to present the tiny tots, by air, to her juvenile audience, was the author herself, Camilla Anson.

Camilla protested, overwhelmed by the possibility. "But I can't do everything," she objected, bewildered.

"How can I do ad copy, write manuscripts and broadcast two days each week?"

"It is a pretty large order, but you can do it," the advertising manager encouraged. "You will have a secong to attend to everything except your most personal work, and the broadcasting after the first few experiments will become very natural to you. We can arrange for the national hook-up from here instead of from the New York studios."

So it was arranged, and Camilla returned to her apartment that evening so thrilled and bewilderred and she couldn't decide whether to laugh or cry. In his arms, she summoned Peter and, scaring in his arms, tried to calm out of her emotions.

He held her close, scarcely believing what his ears heard; that his

Camilla had become a national figure in her field, almost overnight. He had recognized her talent from the beginning, but to have the world recognize her so quickly was a revelation and an enigma at the time.

"Why, precious!" he exclaimed, holding her off to gaze into her flushed face. "I shan't be able to afford a wife like you any longer."

"Peter, don't say that!" she laughed happily. "None of it would be any good at all, without you. And if you don't want me to do it—I won't."

"You mean that?" incredulous.

She met his eyes bravely. "I do, Peter."

He drew her again into his embrace. "My darling, as I could I deny you the right to take such an opportunity when I can't take care of you? Some day—perhaps—" his arms relaxed about her and his words became impatient. "Oh, I don't know. I've always talked about what I am going to do, while you have kept quiet—and done it!"

That old expression of haunting doubt and chagrin clouded his face and the monster of jealousy gripped insidiously at his heart. He tried valiantly to shake it off, but its hold was tenacious. He sank into a chair, listlessly.

Camilla was on her knees beside him, instantly, as if she had leaped a widening chasm in desperation. Her arms clung to him. "Peter, dear Peter, tell me you don't want me to go on with this! Tell me the truth!" she pleaded. "I want to do just what you wish for me, what your love will let me do. I don't want to obey anyone or have anything except you and your love."

He was instantly contrite, tender.

"Why, if I could plan your life for you, I couldn't wish it to be more perfect. You don't think I'd be a dog in the manger, do you?" he demanded, with a tremulous attempt at mirth. "I guess I'm just so proud of you and glad for you that I don't know how to act—don't know what I'm doing."

"Are you sure?" anxiously.

"Why, of course. Tell you what, every day you broadcast, I'll tune in and get more inspiration from hearing your voice while it speaks to the whole nation than I could get a dozen other ways. I'll say to myself, 'That's your wife, you wonderful pup. She did that all by herself and in no time. Get yourself to work and deserve her!'

With such gay jesting and repeated assurances, he convinced her of his approval, with this reservation:

"Of course, if that day ever comes when I can match your salary, Mrs. Anson, you will be expected to meet the terms of our original agreement."

"That day can't be soon for me," she declared, earnestly.

(To Be Continued)

Marvels Of The Heavens

Astronomer Gives Some Idea Of Age Of Sky

Sir James Jeans, the astronomer, unfolded some marvels of the heavens in a lecture at the Royal Institution recently. Here are some of them:

Altogether there are 100 million stars. They are scattered round in the shape of a gigantic cartwheel.

This wheel of worlds goes round with majestic slowness. Each revolution takes 250,000,000 years. During the whole of the civilized epoch the wheel of worlds has only moved as much as the hour hand of a clock moves in one second. Yes—and this will give you some idea of how old the skies are—the wheel of worlds shows evidence of having gone round thousands of times.

Canadian Hardwood

An increase of 100 per cent. in sales of Canadian hardwood to Great Britain for the first three months of this year has been reported. The figures are placed at 1,200,000 cubic feet this year compared with 604,000 cubic feet during the same period in 1933. Canadian hardwood is being used in increasing quantities in Great Britain for flooring, furniture, and the manufacture of automobile bodies.

It is a pretty large order, but you can do it," the advertising manager encouraged. "You will have a secong to attend to everything except your most personal work, and the broadcasting after the first few experiments will become very natural to you. We can arrange for the national hook-up from here instead of from the New York studios."

So it was arranged, and Camilla returned to her apartment that evening so thrilled and bewilderred and she couldn't decide whether to laugh or cry. In his arms, she summoned Peter and, scaring in his arms, tried to calm out of her emotions.

He held her close, scarcely believing what his ears heard; that his

The New Diana

Fast Mail Plane Of Imperial Airways Well Named

Endurance feats like those of Mrs. Molisson and Miss Jean Batten will soon cease to have any good excuse.

When Miss Amy Johnson flew to Australia in twenty days the regular air line ended at Karachi, and she was continuing along a route where no woman had flown before. Miss Batten, taking the same trail in the same type of aeroplane, also had

some reason for enduring the stretch of long days alone in the air. She had not seen her father in New Zealand for a long time and she wanted to get there quickly. She reached Darwin in fifteen days. A few months hence the mails will need only fourteen days for the journey from London to the great cities in the south of Australia. Instead of travelling, as these two women pilots did, at a speed of eighty miles an hour, the mails will be taken in the new Diana air line at a speed of 145 miles an hour.

Four years ago Mrs. Molisson herself might have been dubbed the new Diana, making her conquests with the aid of horse power in the place of dogs, but leading the chase in otherwise solitary state for the edification of the multitude. Her position as the maker of the fastest time for women pilots between England and Australia had stood unchallenged for four years. Now Miss Batten has dispensed with her simple expedient of spending less time on the ground. There was no need to prove that engine and aeroplane would stand such treatment. Mr. C. W. A. Scott and others had driven similar aeroplanes much harder along the same route. Nor was it impossible to obtain faster aircraft for such a journey. The flight clearly was a test mainly of stamina in the pilot, made at the best time of the year for flying and along a route which is nearly ready for the operation of regular mail services. In that sense such a flight will never lack excuse; but when the new Diana of Imperial Airways has taken up her duties, and is courting along the route once a week in either direction, solitary flights by accomplished young women will fall into the category of channel swimming and motor car reliability trials. Some time in the future the air cruise to Australia may be undertaken in the spirit of boldness rather than of achievement; and when the chase has thus become a procession even the new Diana will have been dispensed by something still more mechanically efficient.—London Times.

Heathdale Happenings

Collholme U.F.A. Local met at Collholme school Saturday, July 7, 1934 at 2 o'clock. Mr. R. Robinson was elected delegate to the convention to be held at Cereal July 19. This is the Acadia Provincial Convention. Mr. A. Carlson and Mr. Warren spoke on the C. C. F. "Production For Use, Not For Profit." A few resolutions were then drawn up to be presented at the convention.

Evelyn Anderson entertained a number of young friends on Monday, the occasion being her 4th birthday.

Mr. and Mrs. C. Britton visited on Sunday at the H. B. Allen home.

Hail Flattens Crops

In Northern Alberta

EDMONTON, July 11.—Whipped along by cyclonic winds, electrical storms showered hail and heavy rain in damaging style Tuesday night and left in their wake one dead, another injured and severe property loss in wide sections of Alberta and Saskatchewan.

A 400 mile area of Central Saskatchewan and Alberta reported serious damage to crops through hail, and a score of towns suffered damage in the wind storm. Telephone and telegraph poles were broken and pitched on to roadways. Windows were smashed and broken glass sent flying along with big clouds of dust that preceded rain and hail. Southern Saskatchewan points also reported damage.

A bolt of lightning struck W. D. Speechley, 27 Lymburn, Alta., as he walked along Portage Ave at Edmonton. He was instantly killed. David S. Hepner, also of Lymburn, walking beside Speechley, was injured.

A hail storm, accompanied by winds of cyclonic force, caused widespread damage to buildings and crop between Steettler and Castor Tuesday afternoon.

The full force of the storm was felt at Castor.

Mr. and Mrs. E. C. Pfeiffer and baby also Verna Murray motored to Alsask on Friday where they visited at the home of Mr. Pfeiffer's father.

Oldtimers Reunion To Be Held On July 25

At the meeting held at Collholme school last Saturday, it was decided to hold the picnic on July 25th.

Allen and Rideout—That the finance committee be the same as last year. Carried.

Grounds Committee—W. Shier, W. Wilson, J. Trogan, W. Anderson, J. Haggarty, Mr. Laughlin, J. Aitken, H. Allen, J. Rasmussen and L. Leftwich.

That the sports and grounds committee make all arrangements.

That A. Carlson, E. B. Allen and J. Robinson look after the Coffee.

Open Air Service

A very enjoyable afternoon and evening was spent by those who attended the open air services on Sunday at the home of Mr. and Mrs. James. The service commenced at 3 pm. Mr. Manning of Calgary gave the message and was listened to with great interest. The Collholme quartet sang "Living for Jesus." After the service preparations were made for supper, some eating in small groups but the most joined together and made a big table near the house. Mrs. James served coffee assisted by several willing helpers.

The service in the evening commenced about 6:30. Mr. James and Houn assisted at this service. Mr. Manning gave a most inspiring sermon. The Collholme quartet gave another anthem and as the sun was setting all departed for their respective homes after a perfect afternoon. Mrs. Trigan was organist assisted by Miss Spreeman, who was injured.

Fourteen thousand eight hundred and forty-three happy holidaymakers can't be wrong, or so the Canadian Pacific Steamships expect to be this summer with four short sea cruises by the Duchess of Richmond between Montreal and New York.

The Duchess has last year made two transatlantic cruises on day trips, the popularity of which has been shown by the fact that 11,845 passengers were carried on those vacation cruises.

The Duchess of Richmond's cruise departs from Montreal July 16, July 21, July 31, August 19 and August 29, and from Quebec on the same days. Sixteen hours will be spent in New York, 10 in Montreal, 11 in Quebec, 24 in return to Montreal on July 30, August 9, August 10 and August 29. The day prior to arrival in Montreal eight hours will be spent in Quebec, with opportunities and facilities provided for exploration of the Ancient Capital and surrounding districts such as the Cote de Beaupre, with its famous Shrine of St. Anne. Sightseeing trips in New York will also be available for those who prefer to take them.

All cruises, each characterized a long cruise have been planned for the Duchess of Richmond's nine day cruises, and each day of the trip down the majestic St. Lawrence and around the scenic coasts of Nova Scotia and New England will a complete experience in itself.

Facilities for enjoyment, both in exercise and relaxation, include an open-air swimming-pool, a gymnasium, deck-tennis, horse-racing, shuffleboard and many other sports, and also the opportunity for lazy do-nothing, for which no better medium can be found than a comfortable deck-chair on a long, warm afternoon.

William Webber, who has directed all previous "Duchess" cruises to New York, will again be cruise director, and all manner of entertainment and organized enjoyment for the cruise members will be provided under his direction and that of the Staff-Captain and the Director of Entertainment, whose command will be Captain Arthur Rathwell, for several years commander of the Montreal and recently appointed to the Duchess of Richmond.
